WORK

Engineering Practice Lead / Pivotal

OCT 2018 - PRESENT

- Enabled leadership team of large department of defense client to run modern product organization
- Supported a community of practitioners alongside my client pair, as it scaled from 15 to 70 engineers
- Facilitated discussions amongst practitioners to evolve engineering practices in alignment with core values
- Defined expectations and responsibilities for technical roles within the organization
- Designed an engineering interview process and coached a team of interviewers to execute it

People Manager / Pivotal Labs

JUL 2018 - JAN 2019

- Supported the growth of software engineering reports with goal setting, gathering & synthesis of peer feedback, and ad hoc advising
- Acted as an advocate on behalf of my reports in the context of discussions with office leadership around allocations/staffing, new opportunities/roles in the office, and compensation

Senior Software Engineer / Pivotal Labs

JAN 2018 - JAN 2019

- Built web applications with event driven patterns for large department of defense client to eliminate dependencies on existing error-prone methods of communication
- Developed backend for financial services company to surface outstanding cash of unsettled transactions to their clients. Integrated existing QA practice into an agile product team
- Developed redesign of large ecommerce checkout flow to improve upon customer conversion rate
